PROFILE

Having overcome an illness that I developed during my undergraduate studies, I am excited to immerse myself in my career. I am excited to nurture my love of software by building fantastic projects and solving problems using code.

SKILLS

HTML, CSS, Sass, JavaScript, TypeScript, Document Object Model (DOM), Web APIs, RESTful APIs, React, Node.js, Express, Next.js, MySQL, Knex.js, Pair Programming, Agile, Scrum, Git, Git Flow, GitHub, User Authentication, OAuth, Vitest, Jest, Netlify

PROJECTS

Lead Coder | [StockPilot](#)

OCT 2024, BRAINSTATION CAPSTONE

- Used React and Sass to build front-end, Node, Express, MySQL, and Knex for building the back-end portion including the database, server-side software, and API.
- Used Git and GitHub for version control, Scrum & Jira for project management, Vitest to test the app, and Netlify to deploy.

Lead Coder | [Mindful Moments](#)

OCT 2024, BRAINSTATION & BELL CANADA INDUSTRY PROJECT

- Used React, Node, Express, and Pair Programming to build an innovative app in a team, based on the challenge posed by judges from Bell Canada: to raise awareness and engagement with Bell's Let's Talk initiative.
